

CLINF-R Contacts

The CLINF-R contacts map shows all organisations that are associated with at least one of the CLINF work-package member institutions UmU, SLU, SVA, and LUKE. In the map, blue dots symbolise the CLINF institutions that so far have collaborated with Russian organisations. Green dots symbolise successfully established CLINF contacts with Russian organisations, whereas red dots symbolise less successful attempts of establishing contact with Russian organisations. Russian field-stations associated the [INTERACT](#) research infrastructure are symbolised with yellow dots.

In general, Russian organisations with a focus on animal diseases are mostly linked to SVA, whereas organisations with a human focus were connected with UmU. The bilateral contact with INTERACT stations is assigned with SLU.
